

INDUSTRY FALL PROTECTION GUIDE

THIS GUIDE WILL HELP YOU SELECT THE CORRECT FALL PROTECTION PRODUCTS FOR YOUR FIELD. THERE ARE THREE PRODUCT CATEGORIES WHICH COMBINE TO PROVIDE YOU WITH THE BEST SAFETY.

1. HARNESS >

LINQ full body harnesses have been engineered and certified to provide the wearer with maximum safety, comfort and versatility while working at heights. Below there are two suggested variations that best suit each working at heights task.

2. LANYARD/SRL'S >

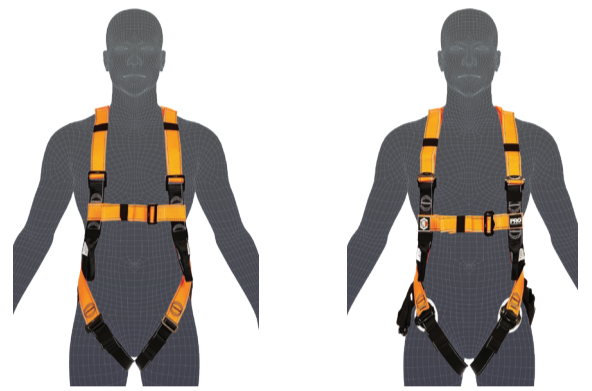

LINQ lanyards are critical pieces of personal protection equipment (PPE) for working safely at heights as the connection between the harness and an anchorage is designed to absorb energy in the event of a fall. LINQ self-retracting lifelines (SRL's) extend and retract automatically, allowing the user to operate within the recommended work area permitted by the AS/NZS Standard. Shown below are the best suited options for your working at heights tasks.

3. ANCHORAGE/ACCESSORIES >

When attached to a suitable anchorage point, the anchorage connector completes the worker's fall arrest system. Workers should refer to AS/NZS 1891.4 for guidance on anchorage selection and strength.
